Abortion Drone Will Fly Dangerous Abortion Pills to Poland to Violate Its Pro-Life Laws

INTERNATIONAL ([HTTP://WWW.LIFENEWS.COM/CATEGORY/INTERNATIONAL/](http://www.lifenews.com/category/international/))

The pro-abortion organization that formerly ran the abortion boat that distributed the dangerous abortion pill in international waters outside pro-life nations that protect unborn children has come up with a new marketing scheme to push abortion in pro-life nations: drones.

On Saturday, the pro-abortion group Women on Waves will have an abortion drone fly for the first time to deliver abortion drugs and it will fly the abortion pills from German to Poland, which protects unborn babies from abortions.

“The Abortion drone will mark the different reality for Polish women to access to safe abortion services compared to other women in Europe. In almost all European countries abortion is legal, only in Poland, Ireland and Malta abortion is illegal and women’s rights are still violated,” the group said in an email LifeNews.com obtained. “The drone will start its journey at 11 AM from “Am Winterhafen” in Frankfurt an der Oder and fly to Słubice. There will be opportunity for the press to ask questions after the landing of the abortion drone in Poland. The exact location will be announced on Friday evening.”

“Drones are used to make areal shots and for military purposes. However they can also be used to deliver packages. Both Google and Amazon are also already testing the possibility to deliver packages,” Women on Waves said. “So drones can also be used to provide safe abortion pills by uploading the package in Germany, where abortion is legal and delivering it into a border town in Poland where abortion is severely restricted since 1993.”

The abortion boats were deviously operated just outside the territorial coastal waters of pro-life countries to avoid having to comply with the laws of those nations. In the same way, Women on Waves appears to have found a way to fly drones inside pro-life countries with abortion pills in a manner that doesn't violate the sovereign airspace of the pro-life nation.

"As the Abortion drone weighs less than 5 kg, is not used for any commercial purposes, will stay within the sight of the person flying it and does not fly in controlled airspace, no authorization is required under Polish or German law," it claims.

Women on Waves will take both parts of the two-part RU 486 abortion drug to Poland. A pro-life physician has described how the two parts cause the abortion of the developing baby. Dr. Mary Davenport explained how chemical abortions involve two drugs:

"Medical [chemical] abortion is actually performed in early pregnancy with TWO pills, the first – RU-486 – mifepristone or Mifeprex, antagonizes the hormone progesterone, which is necessary for pregnancy. This cuts off the nutritional supply to the pregnancy, ending in the unborn baby's death. One or two days later the woman takes a second pill, misoprostol or Cytotec, which causes uterine contractions and expels the pregnancy. Medical abortion is frequently a horrible experience for the women, lasting up to 2-4 weeks with nausea, vomiting, diarrhea, hemorrhage, and intense pain."

Although Women on Waves says the abortion pill is safe, evidence from the United States indicates that's not the case.

The FDA has documented 2,207 adverse events in the U.S. of women who have had medical abortions, including 14 deaths, 612 hospitalizations, 339 cases where blood loss was so great the woman needed a transfusion, 256 infections and 58 ectopic pregnancies. Women who died from medical abortions died from a bacterial infection like toxic shock, hemorrhaging to death, ruptured ectopic pregnancy and massive heart attack.
