Feminist activists have sent a drone carrying abortion pills from Germany to Poland as a protest over the Catholic country's abortion laws.

The pills were collected and swallowed by two women as part of a stunt organised by Dutch pro-choice group Women on Waves.

The country, whose population is 90 per cent Catholic, only allows abortion within 12 weeks of pregnancy in cases of rape or incest.

Feminist activists have sent a drone carrying abortion pills from Germany to Poland as a protest over the Catholic country's abortion laws

Jula Gaweda, who is part of the feminist organisation Feminoteka, said: 'The operation went well. 'It's a symbolic operation designed to show that just a few kilometres (between the take-off and the

landing site) can be a gulf in terms of respect for women's rights and reproductive rights, which are human rights.'

The abortion limit can be extended to 24 weeks, but only in cases of irreversible foetal malformation or a threat to the mother's life.

After 24 weeks of pregnancy, the procedure is allowed on a case-by-case basis if the mother's life is at risk.

It comes after the government recently authorised the morning-after pill.

Women on Waves has over the years sent 'abortion boats' to countries including Ireland, Portugal and Spain to provide women with free treatment that circumvents strict abortion laws.

The arrival of one of these boats in Poland in 2003 prompted a wave of protests, while ultra-Catholic newspaper Nasz Dziennik branded the delivery a 'drone of death' ahead of its landing.

Pity they don't do the same here. That way OUR kids could get into OUR schools with others kids who can actually speak English !

Like it or not pro-lifers, if all of these fetus' were born. There would be no system able to cope with them. How many kids have you adopted eh?? How many kids are failed by the system and have terrible lives and turn to drugs and crime and turn into people you crazies would happily give the death sentence?! It's not all baby powder and forehead curls.

They needn't have bothered. Anyone in Poland can oder the pills online from Germany and have them delivered by post. No need for drones and PR stunts.
